

ASSIGNMENT 4

Goal:

Implement one search algorithm
Understand how to use search to find a solution

Jealous Husbands Implementation:

Write a program that find the solution to the J.H.P

If Solution is found:

Indicates the actions (in order)

If solution is not possible:

The program will indicate 'no solution found'

Must Use one of the following:

- Breath - First Search
- Depth - First Search
- Greedy - Search algorithms

It needs to include the:

- Goal - Test
- ACTIONS,
- CHILD - NODE
- SUCCESSOR
